Lab 1 – Introduction to C#

Instructions: Complete each problem. If you're struggling with a problem, feel free to ask questions on the class forum.

This lab is optional, but it gives you valuable programming experience. You should definitely complete the lab if you can.

Problem 1 – Output (your name)

Create a new C# Console Project named Lab1.

Add a line of code that will display your name to the user.

Problem 2 – Output (your best friend's or your nemesis' name)

Add code to output the name of your best friend or your nemesis.

Problem 3 – Output (your favorite three games)

Add code to output the name of your three favorite games. Each game name should appear on a separate line.
